Plan Outcomes

Ideas on
Choices

move dc

- Coordination of transportation modes
- More and better travel choices in all parts of the city
- Short- and long-term priority as well as supporting policies
- Plan for funding and financing our transportation needs

moveDC Vision

Ideas on
Choices

move dc

The District of Columbia will have a **world class transportation system** serving the people who live, work, and visit the city.

The transportation system will make the city more livable, *sustainable*, **prosperous**, and attractive.

It will offer everyone in the District *exceptional travel choices.*

moveDC Vision

Ideas on
Choices

move dc

The District of Columbia will have a world class transportation system serving the people who live, work, and visit the city. The transportation system will make the city more livable, sustainable, prosperous, and attractive. It will offer everyone in the District exceptional travel choices. As the transportation system evolves over time, the District will:

- Be more competitive and attractive locally, regionally, nationally, and internationally
- Have safer and more vibrant streets and neighborhoods
- Have cleaner air, streams, and rivers and be more responsive to climate change
- Accommodate the travel needs of all residents, workers, and visitors regardless of age or ability

Our Tools: Building Blocks for the Future

Our Tools: Building Blocks for the Future

There are many different approaches to

Achieving the Vision

What You Told Us

Ideas on
Choices

move dc

■ Agreement

- Better pedestrian access/accommodation
- More and better transit
- Using what we have efficiently
- Sustainability
- State of good repair

■ Divergent views

- Where the focus should be
- Some people are satisfied with the investments we are already making
- Many concerned about effects of regional traffic on DC neighborhoods
- Many focused on downtown mobility and access

An aerial photograph of a city grid, likely Washington D.C., showing a dense network of streets and a prominent river with a bridge crossing it. The image is in a light, faded color palette.

WHAT WE'RE WORKING ON NOW

Ideas Lead to Approaches

Ideas on
Choices

moveDC

- Three different approaches that may help achieve the vision
- Each approach aims to provide a complete, multimodal transportation network

The Approaches

move dc

- These are not the plan
- Test big ideas to understand if they should be included in the draft plan
- Err on the side of going too far, rather than not far enough
- Adjust, based on what we learn
- Analyze and evaluate
- Report results

Big Ideas

The system has something for everyone. Let's keep it that way.

Let's really fix the congestion downtown and the whole city will be better off.

Focus on short-distance travel and the District will be more livable.

Approaches

Why These Approaches

Ideas on
Choices

move dc

- Approaches developed based on input from committees and public
- Tension between
 - Commuter trips
 - Local, short-distance trips
- How and where should each be accommodated?
- Individual elements informed by your input (How's It Moving + others)

An aerial photograph of Washington, D.C., showing the city's grid and the Potomac River. A red speech bubble logo is positioned in the top right corner.

TODAY'S WORKSHOP

Activities

Ideas on
Choices

moveDC

- Participate
 - Review existing transportation conditions
 - Consider future trends
 - Review three approaches for the future transportation system
 - Tell us what you like and what you don't
 - Tell us what you think the likely outcomes will be
- Talk to a moveDC team member

Upcoming Events

Ideas on
Choices

move dc

- Spread the word and tell your friends
 - Tweet @wemoveDC | #IdeasMoveDC
 - Facebook.com/wemoveDC
 - Flickr.com/groups/wemoveDC
- Web meetings - sign up at www.wemoveDC.org
 - June 12th: 7 to 8 p.m.
 - June 13th: noon to 1 p.m.
- TPAC meeting Thursday, June 26 from 6:00 to 8:00 p.m.
- Surveys
- Public workshops in late September/early October
